<b>Event:</b> Amelia gets married	<b>Date:</b> 1931
<b>Event:</b> Amelia became the first to fly solo across the ocean	<b>Date:</b> 1932
<b>Event:</b> Amelia Dies	<b>Date:</b> 1937

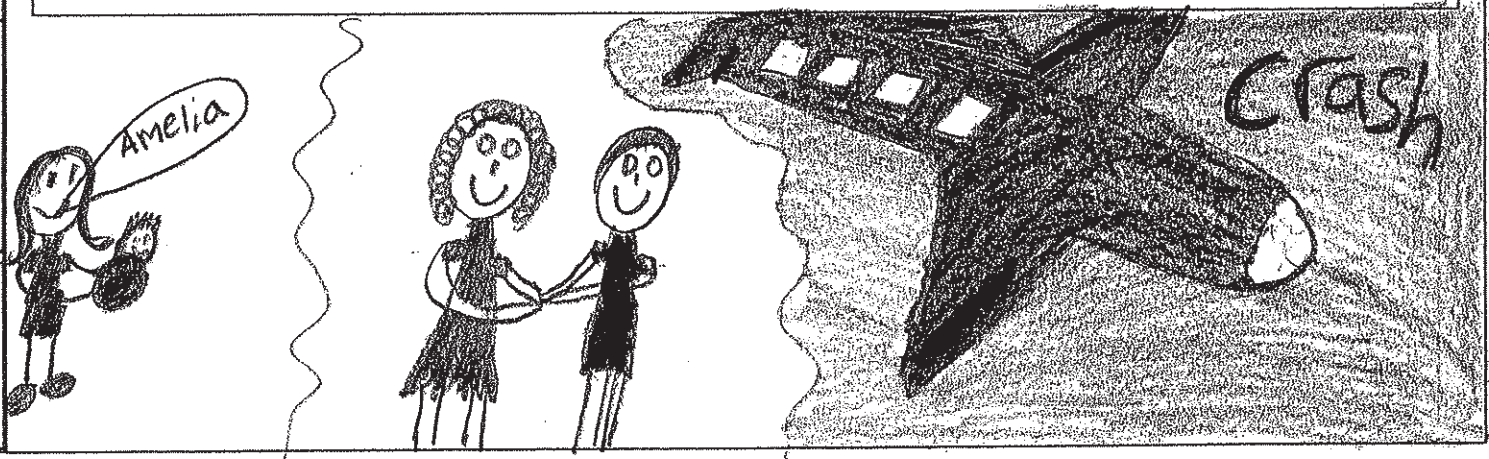

Amelia Earhart was born July 24 in Atchison, KS. On February 7 1931 she married George Putnam. Even though she married George Putnam she still got to keep her last name. For a while she was called Amelia Earhart Putnam but then people stopped and just called her Amelia Earhart.

Amelia didn't just live in one place, she lived in many different places like, New York City, Boston, Los Angeles, Atchison, KS. Amelia set many different records, but when she tried to set a new record she flew into the Ocean and died.

### Amelia's life

## Editorial

I really like Amelia Earhart I think she is kind of crazy because she always wanted to be first to try things, and that's something I don't always do. I think she is also cool though because she did amazing things and set a lot of records.

Amelia Earhart

## Memorable Contribution

Amelia Earhart did a lot of cool things but my favorite out of all was that she was on a shed and was going really fast and could not stop before the bad and slid under a house and a wagon without getting hurt. Yes I know she did many

other cool things like fly across the ocean, but I just think it's the coolest.

"Courage is the price that life exacts for granting peace."
